

American Legion Auxiliary
Department of California
Education Bulletin
August 2021

Hello Education Chairmen~

Welcome to a new Auxiliary year. We are looking forward to an amazing year as we "Catch the Wave" to serve our Veterans, our children and our community. If you are new to the Education program, please take the time to familiarize yourself with all the components of the program. If you are a returning chairman, thank you! Your knowledge will be very useful as we move forward. A very important point is that under department code, the Education chairman may not serve on multiple levels of our organization. For example, while I serve as Department chairman, I may not serve at the District or Unit level in the Education program..

This year, the education program will be known as "wind surfers". We will be getting out our boards and sails as we move forward, promoting our program all the way. We will be focusing on different aspects of our program throughout the year, with a focus on "Give 10 to Education" as our first piece. More information will be provided at the Clovis workshop. There will be a packet for District chairmen in the workshop packets. Scholarship information will be available on the website, so please be sure to check in often for any updates.

Thank you for being a part of the Education program and making it possible for our youth, members and our communities with furthering their education and realizing their dreams. Please feel free to reach out if you have any questions or concerns. I may be reached either by text or email. This information is provided at the bottom of this bulletin.

Yours in Service~

Robin
